

CasinoTrac system approved for casinos in Nevada after successful field trials

MINNETONKA, MN, August 15, 2017 – Table Trac, Inc. (OTCQB: TBTC) announces that its CasinoTrac® online management system and cashless wager system have been approved by the Nevada Gaming Control Board's Technology Division lab for group 1 and group 2 nonrestricted licensee casinos.

Table Trac's Casino Management System is the first new complete slot online management system that incorporates its own approved cashless wagering system to enter the market in Nevada in over a decade. Table Trac is now one of a select few companies that can meet the needs of all casinos that are licensees in Nevada. There are over 330 casinos in Nevada, and CasinoTrac, the new feature rich easy to use system, scales beautifully to fit any size floor while offering unmatched value for the operating budgets in these casinos. With updates included, and no planned obsolescence, CasinoTrac is operator friendly, and backed by a U.S. based support team.

Table Trac's president and founder, Chad Hoehne, stated, "I want to thank the Nevada Gaming Commission's technology division lab for guiding us through testing of every system aspect for functionality and correct compliant operation. We are so pleased with the positive response we are already seeing in Nevada. Our team is staged and prepared to begin servicing Nevada casinos, including our three iconic field trials sites, Club Cal Neva, Sierra Sid's and Mizpah." Hoehne added, "This is by far the most exciting milestone of our 22 years of being in business."

Jeff Siri, President of Club Cal Neva, commented, "Club Cal Neva, which is a Nevada group 1 licensee, was the first casino to install CasinoTrac in Nevada, and worked closely with Table Trac to complete the Nevada required field trials. I am happy to say we are very pleased with the system. The installation of CasinoTrac was very smooth and the accounting and player tracking have added to our ability to track machine performance and market to our customers."

Frederic Cline, Owner of Mizpah Club at the historic Mizpah hotel in Tonopah, Nevada, stated "Table Trac's system has been a fantastic addition to our property and has allowed the Mizpah Club to dramatically improve the experience of our players. Not only has the CasinoTrac system had perfect uptime over the course of its field trials at our site, it offers tremendous flexibility to craft player rewards and promotions, setting us apart from the competition."

"CasinoTrac is intricately involved, not only in the support of their properties, but also the ongoing success of each location. Their 24 hour support is responsive and their highly trained and friendly staff is unparalleled." commented Adam Barba, General Manager at Sierra Sid's Casino and Atomic Bootlegger Lounge in Sparks, Nevada. He went on to state, "Table Trac's system has greatly improved the customer experience at Sid's. The system's marketing capabilities give our players new fun options for more play, more rewards, and bonus chances for additional winning."
