

Table Trac signs first Nevada casino contract with iconic downtown Reno casino

MINNETONKA, MN, August 22, 2017 – Table Trac, Inc. (OTCQB: TBTC), one week after announcing that its CasinoTrac® online slot management system was approved for Nevada group 1 and group 2 nonrestricted licensee casinos, today announces its first casino system contract with downtown Reno’s “best bet,” Club Cal Neva.

Club Cal Neva replaced its old online casino management system with Table Trac’s feature rich easy to use system, the first new slot online management system that incorporates integrated cashless wagering ability to enter the market in Nevada in over a decade. The system provides Club Cal Neva with Nevada compliant revenue reporting, innovative marketing features, unified operations enhancements, and compliance tools all in an operator friendly format backed by a U.S. based support team.

Table Trac President, Chad Hoehne, stated, *“We are excited to showcase our newly approved system at this Nevada gaming institution. The Club Cal Neva in downtown Reno has all of the casino amenities in a relaxed classic gaming hall atmosphere. A wide selection of the latest games and all the classic favorites makes this diverse gaming floor uniquely entertaining for the guests, and a great place for CasinoTrac’s next generation online slot management system to enhance the player experience.”*

Jeff Siri, President of Club Cal Neva, stated, *“With the installation of CasinoTrac, the Club Cal Neva has the latest technology in Slot Systems, including player tracking that will better assist us in marketing to our customers. The system is very user friendly and agile, making it very simple for our employees to learn how to manage their way throughout the system. Additionally, the real time reporting makes managing our slot floor easier than ever. Another fantastic benefit of having CasinoTrac is that updates to the system are included, which means that we will always have a system that is current with new technology and customer benefit offers. It is our intention to move forward immediately with installation of CasinoTrac at our second property, Siri’s Casino.”*
